

# Monsy (React Native)

---

## Environment confirmation

In React Native template application, please setup environment follow React Native environment setup guide first.

<https://docs.timistudio.dev/docs/environment-setup/react-native-environment-setup>

Then to confirm all setup is ok, please execute command below to verify.

```
$ yarn -v
1.22.17

$ node -v
v14.17.5

$ npm -v
6.14.14
```

If you are using MacOS and work with iOS, please check your XCode is latest version.

```
$ /usr/bin/xcodebuild -version
Xcode 13.2.1
Build version 13C100
```

## Run in development

```
cd <react-native-project-root>
yarn install
```

If you are using npm without yarn

```
cd <react-native-project-root>
npm install
```

Then, start Metro with command below

```
npx react-native start
```

Finally start simulator with command below

```
react-native run-android
```

If you develop with iOS application

```
react-native run-ios
```

## File structure

```
- __tests__
- android/                # ReactNative default
  android files
- ios/                    # ReactNative default iOS
  files
- src/assets/             # Image asset files
- src/components/         # React components
- src/config/             # React config
- src/lib/                # React library
- src/models/             # React config redux
